

## PROVIDING SIMPLE & STABLE MANUFACTURING SOLUTIONS FROM CONCEPT TO YOUR DOOR

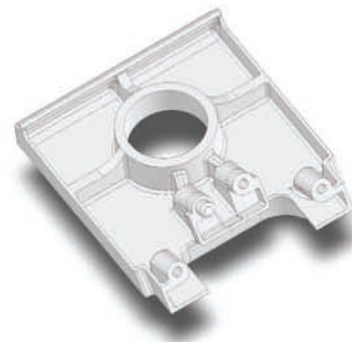

**E**stablished in 2003, ANK Design offers you professional services in all kinds of component sourcing, through design, specification, quality control, import, and export.

A sound background in sourcing trade fairs and access to a wide range of national and international suppliers uniquely positions us to facilitate a wide range of products.

We specialize in procuring and supply of high temperature resistant materials and components, ceramic heating elements, scientific glassware, and electronic assemblies.

We work with companies that reduce consumption and increase recycling, not just to better the environment downstream but to reduce costs as well! Green does not have to mean higher price and decreased functionality.

There is no job too small for ANK Design, and we invite the changes and updates that you need to make your products the best. We understand that design changes are inevitable. We are flexible.

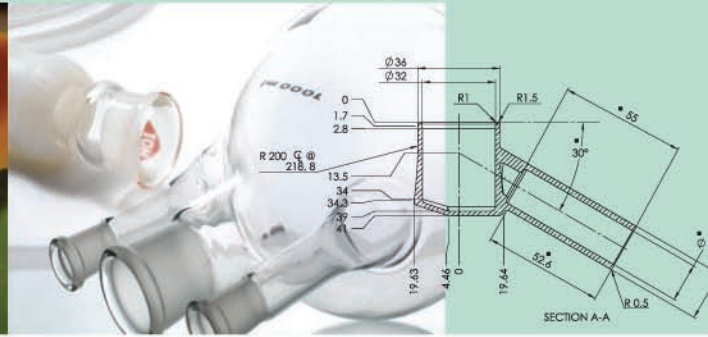

- **ECONOMICAL RUBBER AND CERAMIC PARTS—MOLDED AND DELIVERED TO CUSTOMERS' DOOR**
- **LOW COST PROTOTYPING IN REAL MATERIALS—NOT SUBSTITUTES; ALLOWS CUSTOMERS TO TEST DESIGNS IN ACTUAL CONDITIONS**
- **EXCEED QUALITY AND TEMPERATURE REQUIREMENTS**
- **SOURCING: ELECTRONIC PARTS AND ASSEMBLIES, CERAMIC HEATING ELEMENTS, ALUMINA RODS & TUBES, PLASTIC INJECTION MOLDING, AND SCIENTIFIC GLASSWARE**

Our mission at ANK Design is to find, develop, and provide simple and stable sourcing solutions that will save time and cost with a continued commitment to green business values.

We source out the best solution, whether local or global, so that our customers can focus on their operation and we take care of the rest.

## SERVICES PROVIDED

### • Ceramic Products

Injection Molding, Extrusions

Alumina 95% & 99%, Mullite, Porcelain, Steatite, Cordierite

Alumina Ceramic Heaters, PTC Heaters

Baked-on Labels

*Low minimum quantities and low tooling charges*

### • Scientific Glassware

Tubing

Custom Connectors / Adapters

Ground Glass Tapered Joints per ASTM E676

Bottles

Baked-on Labels

### • Electronic Assemblies

Thru-hole and SMT, Flex PCBs, High Density PCBs, Multilayer PCBs

Testing and Calibrating Services

*Electrical Engineer on staff to evaluate your design for stability and ease of manufacture*

### • Injection Molded Plastic

Acrylic, ABS, Polycarbonate

*Low minimum quantities and extremely low tooling charges*

### • Silicone & Rubber Products

Compression Molding, Extruded Tubing, Liquid Silicone Injection Molding

High Temperature 500°F, Fire Resistant, Medical Grade, High Voltage Insulating,  
High Strength Rubbers compliant with: RoHS, REACH, Non Phthalate, EDA, FDA,  
Polycyclic Aromatic Hydrocarbons (PAHs)

*Low minimum quantities and low tooling charges*

*Extremely low cost sample tooling available for up to 2000 parts*

### • Prototyping Engineering Services

3D Printing

Prototypes in the final material (ABS, PC, etc.)

Machined Aluminum and Ceramic

*Test the form, fit, and function of your part before placing a PO*

### • Wooden Parts

Housings, Casings, High Tolerance Engineered Wood

Decorative Elements, Laser Marked Wood

*Low minimum quantities and low tooling charges*
